DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/15/06 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 00/07863, of which Hilberer (U. S. Patent no. 6,540,308) is the English equivalent. See figures 1 and 3, air inlet 20, outlets to service brakes k1,k2, supplementary outlet to parking brake FBA controlled by electropneumatic components 8,8a, removable drier cartridge 10, complementary outlet K4 with associated electropneumatic components 9,9a, electronic command and control unit 25.

Response to Arguments

4. Applicant's arguments filed 2/15/06 have been fully considered but they are not persuasive. Applicants argue that Hilberer discloses a system that relies upon remote valves to operate the parking brake. There is no disclosure of this in Hilberer.

Furthermore, Hilberer has structure capable of performing the exact same functions as that of the instant invention (supplying variable pressure to parking brake actuators).
